GenerLink Give Yourself Peace of Mind

Give yourself peace of mind during any storm by installing a GenerLink. Spring is a great time to consider installing back-up power methods. GenerLink is a product that makes connecting a generator easy and safe while providing homeowners the opportunity to run critical items in their homes during a power outage. GenerLink eliminates the hassles of running multiple extension cords, or hiring an electrician to install a transfer switch. The device detects when a generator is operating and automatically disconnects from the utility grid, eliminating dangerous back feed to our electrical system.

For more information, or to ORDER a GenerLink contact our office 780-349-3655.

Important Dates:

**Annual General Meeting
April 17, 2019**

**Please note our office will be closed
on the following dates:**

**May 20, 2019 for Victoria Day and

Celebrating 72 Years!

Wednesday April 17, 2019

Westlock Memorial Hall

Doors open at 5:30 PM Supper served at 6:00 PM

Members and Spouses welcome

Tickets are \$5.00 each

and are available from our Office

Proceeds donated to **STARS**® Air Ambulance

SPRING Into SAVINGS!

Follow the below tips to save energy as we SPRING forward!

- Switch the direction of your ceiling fan. In the spring, the fan should turn counter-clockwise to force air down into the room to help cool its occupants.
- Clean off your refrigerator coils. As the weather warms and your pets start to shed, more hair will collect on the coils making the refrigerator work harder. A long-handled brush is perfect for cleaning coils on the bottom or back of the refrigerator.
- During daylight hours, switch off artificial lights and use windows and skylights to brighten your home.
- Seal all window and door drafts to reduce heat loss.

24 Hour Emergency (1-877-749-3655)

24 Hour Emergency (1-877-749-3655)

72nd Anniversary Contest

Month	Winners
January	Mrs. J Nadeau

March	Mr. W Sparshu

These Members won a \$72.00 credit on their power bill. Please stay tuned to our website for more contest details and how you can be entered for a chance to win a \$72.00 credit on your power bill!

Ask Yourself... Where's the Line?

Spring is one of the busiest times for power line incidents!

As you move your equipment back into the fields BE AWARE of the power lines around you. To ensure safety, double check the location of all power lines along your route when moving large farm machinery or bins between fields or on public roadways. If in doubt when planning your route, please contact our office at 780-349-3655 and we will help you plan a safe passage.

Tree Planting Reminders

Spring brings sunshine, warmer weather and the time to plant new trees on your property once the frost is out of the ground.

If you plan on planting trees this spring on your farm or acreage, please keep the following things in mind!

- The drip line of a mature tree must be a minimum of 6 meters (20 feet) away on both sides of the power line.
- If trees or vegetation interfere with a power line or a transformer pole, trimming or complete removal of the trees or vegetation will be necessary.
- Contact Alberta One Call before you dig!
